PORTFOLIO

PROFILE

Frontend Developer with 2 years of experience crafting responsive, production-ready web apps with React.js, Next.js, and TypeScript. I enjoy building things that are both well-structured under the hood and smooth to use — from scalable component systems to API integrations and form flows. I work well in Agile teams, care about clean code, and bring the same attention to detail to every project I take on.

WORK EXPERIENCE

- StoriaKids - Frontend Developer** 2024 - 2025
 - Built and maintained two products from scratch — a public-facing website and an internal CRM/employee management system for 15+ users — translating Figma designs into responsive, cross-browser-compatible interfaces using HTML, CSS, JavaScript, and Bootstrap.
 - Integrated RESTful APIs via Fetch API across both systems, handling dynamic data, error states, and edge-case interactions, while optimizing for performance and mobile responsiveness to reduce load times and UI bugs.
 - Collaborated with designers and backend developers in an Agile environment, managing feature branches, pull requests, and code reviews on GitLab across two parallel codebases over a 1.5-year engagement.
- Self-Employed / Independent Developer** 2025-2026

Dedicated this period to deepening my frontend expertise through self-directed projects, exploring new technologies, and strengthening my skills across the React ecosystem. Used the time to build hands-on experience with tools and patterns I now apply in production environments.

PROJECTS

- Freshcart-Nextjs** [live-demo](#) [Github](#)

Built a scalable e-commerce frontend with Next.js, React 19, and TypeScript, leveraging SSR/SSG for performance and SEO. Developed a reusable component library with Shadcn UI, Radix UI, and Tailwind CSS, and implemented authentication flows with NextAuth and JWT alongside form validation using React Hook Form and Zod.
- linkedPosts-React.js** [live-demo](#) [Github](#)

Built scalable, reusable React.js components with server-state management via React Query, responsive UIs using Hero UI, Tailwind CSS, and Framer Motion, and integrated RESTful APIs with Axios. Also handled form validation with React Hook Form and Zod, dynamic routing with React Router DOM, and streamlined development with Vite.
- storiaKids-vanilla js** [live-demo](#) [Gitlab](#)

A responsive frontend web application for creating personalized children's stories, featuring interactive story browsing, customization flows, and a user-friendly experience built with HTML, CSS, Bootstrap, and Vanilla JavaScript.
- treviaQuizWebsite-vanilla js** [live-demo](#) [Github](#)

A responsive quiz application built with HTML, CSS, Bootstrap, and Vanilla JavaScript that generates random questions across different topics and allows users to test and improve their knowledge.

WORK EXPERIENCE

- B.Sc. in Computers and Information Technology** 2019 - 2023

Alexandria University & Egyptian E-Learning University (Joint Program)
- Frontend Development Diploma — Route Academy** 2025-2026

Awarded for Outstanding Performance and Being One of the Top Achievers in the Frontend Development Diploma.
